

Installing Norton Internet Security™

1. Insert the Norton Internet Security CD into the CD-RW, DVD-ROM or CD-ROM drive and complete the following steps to install the Norton Internet Security software.
Note: If AutoRun is enabled on your system, the Norton Internet Security Installation window will be displayed automatically and you can skip steps 2 and 3.
2. From the Start menu, select **RUN**.
3. Type E:\cdstart (substitute "E" for the appropriate drive letter of your CD-RW, CD-ROM or DVD-ROM drive).
4. From the Norton Installation window, select **Install Norton Internet Security**.
5. Follow the installation instructions that are displayed on the screen.
6. When the installation is complete, click **Finish**.
7. Remove CD from drive.
8. Restart your computer when prompted, so that the changes will take effect.

Important: Norton Anti-Virus must be installed from the Norton Internet Security CD. Installing Norton Anti-Virus from CD will also install the Norton Internet Security firewall. If you don't require the firewall feature, you must remove it via the Windows Control Panel under Add/Remove software. Select the application "Norton Internet Security" application to remove the firewall. A firewall provides protection for constant connections such as DSL or cable modems.
