Martin Whittaker

Vice President, Systems and Solutions Engineering, Enterprise Servers, Storage and Networking Hewlett-Packard Company

Martin Whittaker is vice president of Systems and Solutions Engineering in the Enterprise Servers, Storage and Networking business unit at HP.

Whittaker is responsible for the performance and scalability of HP's server and storage solutions. He also works closely with key HP partners to develop industry-leading appliances and vertical solutions for the Converged Infrastructure, which enable customers to increase agility, lower costs of operations and drive innovation into their businesses.

A seasoned technologist and leader at HP for more than 20 years, Whittaker was previously senior director of Engineering, responsible for the development of the HP-UX operating system and for the integration, quality and delivery of HP-UX operating environments. He also has held a variety of positions related to the architecture and development of storage, servers and I/O systems.

Whittaker holds a bachelor's degree in electrical and electronic engineering from the University of Nottingham in England and a master's degree in microprocessor engineering and digital electronics from the University of Manchester Institute of Science and Technology in England.
